THE FUTURE OF WELLNESS IN INDIA

An average Indian millennial now spends INR 4,000 per month on fitness and wellness. This spending will rise in terms of ticket size and the number of people in this bracket

The 21st century has seen a major shift in attitudes towards wellness, with an increasing number of people recognizing the importance of their health and actively seeking ways to control and improve it. While in the past, fitness and wellness activities were only of concern to a small number of specialists, today over 50% of the population is focused on their health and wellness. While many people are motivated by individual factors such as appearance, health conditions, and entertainment, there is also a growing interest in holistic wellness, longevity, quality of life, and maintaining healthy vitals.

To meet this growing demand, the wellness and technology industries have come together to offer a range of products and services aimed at promoting healthy living. From wellness products and fitness wearables to telehealth apps and smart home gyms, consumers now have access to a wealth of tools to help them achieve their health goals. The wellness industry is also embracing new technologies and virtual experiences, delivering a more immersive and transformative approach to wellness. India, for example, is expected to contribute 3-4% of the \$5 trillion global wellness market by 2025, a significant increase from its current share of less than 0.25%. On average, Indian millennials now spend INR 4,000 per month on fitness and wellness, and this figure is likely to increase.

Wellness brands can be broadly categorized into health, fitness, appearance, nutrition/taste, sleep, environment, mindfulness, and social. In the health category, consumers are spending more on health and are looking for convenient and affordable access to care. The focus on health and safety has also led to a willingness to pay more for health-branded products post-pandemic. Health will be defined by the needs of different patient populations and the effective care journeys they require, with a growing emphasis on consumer-oriented healthcare ecosystems to improve patient behavior and outcomes. Additionally, the portable steam sauna experience shower can also be a valuable addition to the wellness market.

TOP 10 HEALTH BENEFITS OF SAUNA AND STEAM

HEART HEALTH

PEOPLE WHO SPEND MORE TIME IN STEAM AND SAUNA WHERE SHOWN TO HAVE UP TO 63% LOWER RISK OF DEATHS RELATED TO HEART DISEASE

MUSCLE RECOVERY

SAUNA INCREASES CIRCULATION, KEEPING MUSCLES CLEAR OF METABOLIC BYPRODUCTS AND OPEN TO ALL THE NUTRIENTS THEY NEED. IT'S ALSO BEEN SHOWN TO INCREASE LEVELS OF GROWTH HORMONE - AN IMPORTANT PART OF MUSCLE REPAIR AND HEALTHY WEIGHT MAINTENANCE

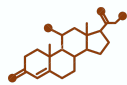

BETTER SKIN

RELAXATION LOUNGERS

We are a company that specializes in designing, manufacturing and supplying custom relaxation loungers and benches for spas. Our products come in both heated and non-heated versions and are made using top-quality materials. These loungers offer various health benefits, including improved circulation, reduced muscle tension, and decreased stress levels. They can be used in different environments such as homes, hotels, outdoor patios and recreation areas.

We offer two types of heating systems for our loungers - electric and water-based. The electric heating system provides a warm and comfortable experience, while the water-based system allows for a more immersive and soothing experience. Whether you're looking for a tranquil haven in your home or wish to provide a luxurious spa experience for your guests, our custom relaxation loungers and benches are the ideal solution.

SPA DESIGN AND BUILD SOLUTIONS

At HALE WELLENSE, we specialize in the design and construction of world-class spa facilities, including steam rooms, showers, ice towers, saunas, bucket showers, hamams, and Moroccan baths. Our experienced team of engineers and craftsmen is dedicated to creating customized spa spaces that meet the specific needs and preferences of each client. With a focus on high-quality workmanship, attention to detail, and timely completion, we have established a reputation for excellence in the industry. Whether for hotels, villas, apartments, gyms, or other properties, we have the skills, experience, and resources to bring your vision to life. Our commitment to exceptional customer service and top-notch construction standards make us a top choice for spa development projects both in India and abroad.

WELLNESS ANNUAL MAINTENANCE PACKAGES

At HALE Wellense, we are dedicated to providing top-notch maintenance services for spa systems such as steam saunas, hammams, and more. Our team of highly skilled and experienced technicians undergo specialized training in Wellense maintenance, ensuring that your spa system is in good hands.

We understand the delicate nature of spa systems and follow strict European standards in all of our maintenance activities. Our commitment to excellence and quality is reflected in the meticulous documentation of all maintenance activities, ensuring that every aspect of your spa system is properly cared for.

Our services are available in India, the GCC, and Asia, giving you peace of mind that your spa system is always in good hands. Our maintenance process involves routine checks and preventive measures to ensure that your spa system is functioning smoothly. In the event of a breakdown, our on-call technicians are available 24/7 to quickly resolve any issues.

In conclusion, at HALE Wellense, we are dedicated to providing comprehensive spa system maintenance services, using the latest techniques and technologies to ensure that your spa system is always in top condition.
